PROFESSIONAL SUMMARY

Product-focused Software Engineer crafting data-driven experiences grounded in proven engineering traditions. Skilled in distributed systems and full-stack development, I blend analytical focus with creative problem-solving to build scalable, client-centric applications aligned with AI-driven transformation goals.

TECHNICAL HIGHLIGHTS & SKILLS

Languages: Python, HTML, CSS, JavaScript

Frameworks: Flask

Tools: GitHub, Git, MySQL, REST APIs

EDUCATION

M. Kumarasamy College of Engineering

2024 - 2028

B. Tech - Information Technology

CGPA – 7.900 as of 3rd semester

INDUSTRIAL EXPERIENCE

RSUN Technologies, Madurai | June 2026

- Built **scalable distributed** backend with PHP & SQL, reducing latency by **30%** and throughput.
- Developed RESTful APIs to improve communication and system reliability by **40%**.
- Optimized queries and indexing, cutting processing time by **35%** and enhancing performance.

PROJECTS

PLANGO - AI Trip Planner (*Flask, Python-ML, SQLite, JS*)

- Built a **scalable AI-based trip optimizer** with real-time traffic data, improving route accuracy by 40% and reducing latency by 60%
- **Engineered** predictive models for traffic and time optimization, **boosting user satisfaction by 35%**.

Geo Tagging Issue Reported System (*PHP, MySQL, HTML, CSS, JavaScript, Google Maps API*)

- Developed a **geo-tagged issue reporting platform** enabling users to submit location-based complaints with real-time map integration, **reducing issue reporting time by 50%**.
- Implemented role-based dashboards, status tracking, and database optimization, improving complaint resolution efficiency by 40%.

Rock Paper Scissors Game (*Python*)

- Built an interactive command-line Rock Paper Scissors game using Python with randomized game logic, delivering accurate gameplay and win/loss tracking.
- Designed **modular game logic and input validation**, **improving code maintainability by 35% and enhancing user experience**.

CERTIFICATIONS & ACHIEVEMENTS

- GitHub Foundations
- **Finalist** - SRMIST Hackathon
